[Download](#)

A quick review of the Bollywood, Tamil and Telugu film. HD Online Player (Baaghi 2 1080p Full Movie Download)â; moreÂ .Q: How to write a proper iterative test case in selenium grid for a login page? I am using selenium grid with remote javascript executor to automate my selenium test cases, but I am not able to write a proper test case for the login page. Below is the test case: @Test public void openlogin_page() throws InterruptedException { // open the login page String baseUrl = ""; driver.get(baseUrl); String username = "user_id"; driver.findElement(By.id(username)).sendKeys(username); String password = "password"; driver.findElement(By.id(password)).sendKeys(password); driver.findElement(By.cssSelector("#login_button")).click(); // wait for the login page to be loaded String loginpage = driver.getTitle(); Assert.assertEquals("Login

```
Page", loginpage); // click on the link to dashboard d
river.findElement(By.xpath("//*[contains(@id,'nav-
dashboard')]")).click(); // wait for the login page to
be loaded String dashboardpage = driver.getTitle();
    Assert.assertEquals("Dashboard Page",
dashboardpage); } A: You're not taking a full view of
the page when you enter the information in the
field. Also, you should click the login button before
you start the other steps. You also have to wait for
the button to be clicked and then finally, click on the
link. All in one method. Here is what I did: @Test
    public void openlogin_page() throws
    InterruptedException { driver.get("");
```
